

How to make a button!

1" Button Template

Cut Line - 1.313"
Picture Size - 0.875"

Step 1:

Place the button dies into the position above.

Step 2: Insert the button components onto the dies.

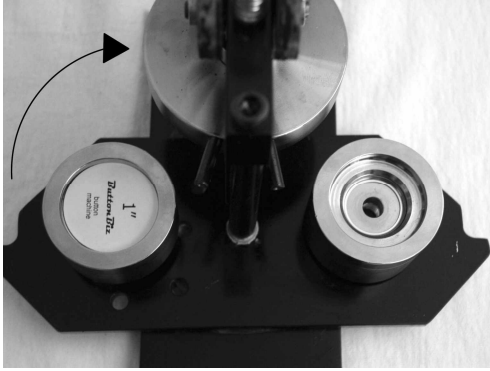

Left Die:

Insert the shell first (sharp edge facing down) and then insert the button graphic. Finally, cover the graphic with a piece of the clear mylar furnished with your button parts.

Right Die:

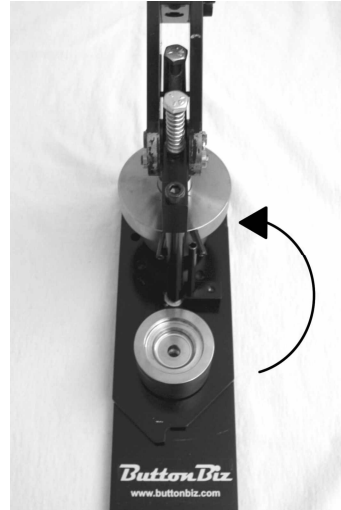

Place the ring (sharp edge facing upwards) on the right die.

Step 3:

Swivel the lower die clockwise. The crimp die is now underneath the upper die. Pull the handle down and lift up!

Step 4:

After lifting up the handle, swivel the die counter-clockwise. Push the handle down and lift up again.

Your Done:

After you lift up the handle, swivel the die clockwise and the finished button will appear!

Insert Pin:

Manually insert the pin into the back of the button.
